

ONLINE NEWS: PUBLIC LECTURES

Ljubljana, 25th January 2015

From November 2015 until March 2016, we are organizing a series of public lectures in the framework of MOČ project. We are preparing lectures in cooperation with Slovenian Diabetes Association and some educational institutions. The main topics of these lectures are depression and suicidal risks and are aimed at general public. The lectures are one of the main activities of raising awareness work package, which is aimed at destigmatization of mental distresses in public. The locations and dates of lectures will constantly be updated online and advertised in local environments.

You are kindly invited!
